Aspire to leverage extensive experience in solution architecture, full stack development, and enterprise platform engineering to drive technology strategy and deliver scalable, high-impact solutions in a senior engineering management role. Seeking opportunities to lead high-performing teams, advance cloud-native architectures, and support business transformation, with a preference for roles based in Pune or remote work environments.

SOFT SKILLS

CORE COMPETENCIES

- **Full Stack Architecture & Design**
- **Full Stack Development Lifecycle**
- **Performance Tuning and Optimization**
- **System Scalability and Performance**
- **Business Process Automation**
- **Requirement Gathering & Analysis**
- **Data Management and Governance**
- **Code Configuration & Customization**
- **Stakeholder Management**
- **Team Building, Mentoring & Leadership**

PROFILE SUMMARY

- **Offering 16+ years** of experience in **full stack development and solution architecture**, delivering scalable and efficient enterprise solutions with a strong record of driving technology improvements.
- Strategist and implementer with deep expertise across the Software Development Lifecycle (SDLC) including requirement analysis, technical design, development, testing, and deployment of enterprise applications.
- Proven experience in end-to-end solution delivery, including client engagement, requirement analysis, workflow design, SOW preparation, solution customization, implementation, and user enablement.
- Delivered enterprise-scale, high-performance platforms using Java, modern front-end frameworks, Big Data ecosystems, and cloud-native technologies.
- Led large-scale migrations to cloud data warehouses, improving platform performance and modernization through cross-functional Agile collaboration.
- Strengthened engineering practices through code governance, scalability engineering, and continuous improvement frameworks, enhancing platform resilience and team capability.
- Experienced in building high-performing teams, optimizing processes, and implementing technology solutions to improve productivity and operational efficiency.
- Strong ability to engage with C-level stakeholders and global teams to align technology strategy with business goals and drive innovation.
- Expertise in HLD and LLD for enterprise systems, designing scalable cloud-native microservices architectures, API contracts, and database models. Experience building real-time WebSocket applications, implementing TDD, BDD, and contract testing, and integrating Amazon S3 for scalable cloud storage.
- Led Agile/Scrum execution, driving sprint planning, backlog prioritization, and story point estimation, enabling high-velocity delivery across globally distributed engineering teams.

CAREER TIMELINE (Recent 3)

Mastek Ltd.	May 2016- Nov 2019	Citicorp Services India Pvt. Ltd. (Citi)
Aug 2014-Apr 2016	Xoriant Solutions Pvt. Ltd.	Nov 2019- Oct 2025

ACADEMIC DETAILS

- **2009:** B.Tech.(Information Technology) from Nagpur University

WORK EXPERIENCE

Nov 2019-Oct 2025: Citicorp Services India Pvt. Ltd. (Citi) as AVP/Technical Lead

Roles:

- **Architected enterprise full-stack platforms** (Data Marketplace Hub, People Insight Hub, Workforce Data Control), leading migration from legacy Big Data ecosystems to cloud-scale data warehouses, improving platform scalability and data accessibility across enterprise teams.
- **Led High Level Design (HLD) and Low-Level Design (LLD)** for microservices-based platforms, defining system architecture, service decomposition, API contracts, and database schema models to support scalable distributed systems.
- Designed **cloud-native microservices architecture** with containerized deployments on Kubernetes/OpenShift, enabling scalable, fault-tolerant services across enterprise applications.
- Implemented real-time application capabilities using WebSocket, enabling event-driven communication between Angular frontends and backend microservices for faster user interactions and live data updates.
- Established engineering quality standards through **Test Driven Development (TDD), Behavior Driven Development (BDD), and contract testing,** improving API reliability and reducing integration defects across microservices.
- Integrated secure and scalable cloud object storage using Amazon S3 and Azure Blob Storage, enabling efficient data storage and retrieval for enterprise data platforms.
- Directed Agile delivery practices, facilitating sprint planning, backlog prioritization, and estimation while strengthening **CI/CD automation** using Tekton and Harness to accelerate release cycles.
- Led cross-functional engineering teams responsible for solution architecture, system integration, and platform delivery, collaborating with global stakeholders and third-party vendors to ensure successful implementation.
- Drove continuous architecture improvements and platform modernization, enabling performance optimization, operational efficiency, and long-term system scalability.

May 2016-Nov 2019: Xoriant Solutions Pvt. Ltd. as Technical Lead

Roles:

- Created and realized strategies for acquiring additional business from clients & effectively using the potential of accounts; performing POCs to evaluate different products and technologies based on customer requirements.
- Engineered and deployed scalable, full-stack HR platforms, integrating Angular/Node.js frontends with secure, containerized backend architectures.
- Optimized platform performance and resilience across **OpenShift/Kubernetes environments**, institutionalizing code governance, technical excellence, and elite engineering mentorship.
- Led **Agile execution, enterprise system design, and delivery automation**, enabling high-velocity, cross-functional product delivery with operational discipline.
- Developed and maintained application architectures for various business functional areas; resolved integration and interface issues between various applications or systems with focus on optimizing application performance and scalability.
- Analyzed existing systems to pinpoint optimization opportunities, delivering strategic recommendations that led to substantial long-term cost savings.
- Introduced data-driven decision-making processes, leveraging key performance indicators (KPIs) to optimize workflows, improving delivery times and minimizing defects.

PREVIOUS WORK EXPERIENCE

Aug 2014- Apr 2016: Mastek Ltd. as Senior Software Specialist

Jul 2012- Aug 2014: CitiusTech Pvt. Ltd. as Senior Software Developer

Sep 2010- Jul 2012: Germinait Solutions Pvt. Ltd. as Software Developer

Nov 2009- Aug 2010: RFArrays Systems Pvt. Ltd. as Software Developer

TECHNICAL SKILLS

- **Full Stack Architecture:** Cloud Platforms, Microservices, Event-Driven Systems, Distributed Architectures, OAuth 2.0, SSO, Service Mesh, Agile/Scrum, AI tools exposure
- **Integration & Security:** API Gateway, OAuth 2.0, SSO, Secure API Design, Service Mesh
- **Data Platforms:** Starburst Enterprise, Oracle, MSSQL, MySQL, NoSQL, ORAAS
- **Front-End:** Angular, HTML5, CSS3, Bootstrap, JavaScript, TypeScript
- **Back-End:** Java, Spring Boot, Node.js, Python (Flask), Spring Cloud Gateway
- **Containerization & DevOps:** AWS, OpenShift, Kubernetes, Docker, Terraform, Jenkins, Tekton, Harness, CI/CD Pipelines
- **Development Tools:** Eclipse, Visual Studio, Postman, VS Code, JFrog Artifactory
- **Source Control & Collaboration:** GitHub, Bitbucket, TFS, SVN
- **Development Methodologies:** Agile (Scrum), DevOps
- **Operating Systems:** Windows, Red Hat Linux
- **Architecture & Engineering Practices:** High Level Design (HLD), Low Level Design (LLD), Cloud-Native Architecture, Microservices Architecture, Real-Time Systems (WebSocket), Event-Driven Architecture, TDD / BDD, Contract Testing for Microservices, CI/CD & DevOps Automation

PERSONAL DETAILS

- **Address:** Pune-412207, Maharashtra
- **Languages Known:** English, Hindi & Marathi
